Entra Private Access | Privileged Identity Management
## For Jump Host Security

JUMPHOST01

CAP 2
- ☑ Device Compliance
- 🔑 Phishing Resistant

App: JUMPHOST01

PIM Group

- ⏱ Just In Time
- 🧾 Approval required
- WHY? Reason required
- 📋 Terms of Use
- 🔑 Phishing Resistant

CAP 1

Entra

Step	Process
1	User tries to access the jump host using RDP - results in a failure
2	User elevates access using Entra PIM
3	CA Policy that controls PIM elevation kicks in. User to meet the conditions
4	User will be added to the PIM group
5	This is the access group provided in the RDP app for Private Access
6	User now tries to Access the jump host using RDP
7	GSA client in the endpoint will make a connection to the GSA cloud in Entra and will look for the traffic forwarding profile, app, protocol
8	CAP 2 will kick in as the user is attempting to access an app governed by Conditional Access. User to complete the process
9	GSA cloud will open the tunnel from the On-premises Jump host to the user's endpoint
